

Electric Boat Level I Approved Supplier List

Note: The Level I Approved Supplier List is based on an evaluation of performance as well as the type of products being procured. Electric Boat Supplier Quality evaluates all Level I suppliers throughout the year and recommends the listed vendors for sub-tier use to forgo further Level I oversight requirements by the primary supplier. The following suppliers have satisfactorily met Electric Boat Level I material controls in accordance with EB-2678P section A3.1.c, and onsite audits are not required for Level I material control. Vendors who use suppliers on this list, are still responsible for conducting audits as part of their supplier oversight in accordance with contract requirements. This list does not include various suppliers that are Level I approved but not normally used for sub-tier use.
