Electric Boat Corporation's Procurement System, Oracle ERP iSupplier, provides four (4) data designations ("Data Sensitivity Levels/DSLs") from which to choose in identifying/designating data items being uploaded to the System.

The selection of a data designation is for informational purposes and does not negate, supercede, nor satisfy any data item marking requirements of the Purchase Order.

The below informational guidance is provided to support appropriate DSL selection.

1. U-NNPI/NOFORN:

"U-NNPI": Unclassified Naval Nuclear Propulsion Information;

- "NOFORN" is the marking applied to U-NNPI, and stands for "Not for release to foreign nationals"

Naval Nuclear Propulsion Information ("NNPI") is defined at OPNAV INSTRUCTION (OPNAVINST) N9210.3, *Safeguarding of Naval Nuclear Propulsion Information*.

U-NNPI is defined as follows: unclassified information concerning the design, arrangement, development, manufacture, testing, operation, administration, training, maintenance, and repair of the propulsion plants of naval nuclear-powered ships and prototypes, including the associated shipboard and shore based nuclear support facilities.

Items not specifically classified or identified as U-NNPI in CG-RN-1 or other correspondence by NAVSEA 08 shall be marked and handled as U-NNPI whenever a sentence, paragraph, document, file, photograph, audiovisual or electronic / IT media, or component contains, or otherwise reveals, at least one instance of an association of the following three elements:

1) A naval nuclear propulsion plant or support facility application is directly referred to by any of the following:
    a. Ship name or hull number
    b. Project designator
    c. Ship system identification
    d. Component nameplate data
    e. Component name revealing a reactor plant
2) A system or component listed in table 2 of OPNAVINST N9210.3
    (your organization must be eligible to receive/handle NNPI in order to view/receive this table)
3) Details on technical parameters or operational conditions (e.g. design temperature)

2. CUI/FOUO:

"CUI": Controlled Unclassified Information, is defined at 32 CFR § 2002.4, as follows:
Unclassified information that requires safeguarding or dissemination controls, pursuant to and consistent with applicable law, regulations, and Government-wide policies.

- "FOUO": For Official Use Only, is a marking, as defined at DoD Manual 5200.01 (V3 Ch2 03/13), as follows:
  A protective marking to be applied to unclassified information when disclosure to the public of that particular record, or portion thereof, would reasonably be expected to cause a foreseeable harm to an interest protected by one or more provisions of the FOIA. This includes information that qualifies for protection pursuant to the provisions of the Privacy

Act of 1974, as amended. See DoD 5400.7-R (Reference (cf)) for detailed information on categories of information that may qualify for exemption from public disclosure.

***Data that is U-NNPI is also CUI/FOUO, however, not all CUI is U-NNPI. Suppliers should select the DSL of "U-NNPI/NOFORN" for CUI that is also U-NNPI, as U-NNPI requires greater control/safeguarding.*

3. Company Sensitive:

This type of information involves a company's privileged/private/confidential, and/or proprietary information (e.g. trade secrets, private financial information etc.).

**For purposes of Electric Boat Corporation's procurement system and selecting a DSL, supplier should select this as an item's DSL if the item is not also CUI (nor UUI, see below). If company sensitive information is also CUI or NNPI, supplier should designate the item, appropriately, as either CUI or NNPI.*

4. Uncontrolled Unclassified Information:

"UUI": Uncontrolled Unclassified Information, is defined at 32 CFR § 2002.4 as follows: information that neither the Order nor the authorities governing classified information cover as protected. Although this information is not controlled or classified, agencies must still handle it in accordance with Federal Information Security Modernization Act (FISMA) requirements.

**For purposes of Electric Boat Corporation's procurement system DSL designations, items that are 'Company Sensitive' are considered 'controlled'/'protected' and so would not fall under this designation.*
