GENERAL DYNAMICS
Electric Boat

Electric Boat, Groton CT facility has undergone updating of our pedestrian walkways throughout the shipyard. Some of the areas that used to be authorized parking have changed, and your drivers may need to find alternate areas to park. The new walkways are clearly delineated via yellow striping. These walkways were created to try and help improve both pedestrian as well as vehicle traffic, and minimize risk of people getting injured.

We are running into issues whereas suppliers are parking their vehicles in the pedestrian walkways, or in a way they are interfering with the pedestrian walkways. We are requesting you speak to your drivers that come on-site and remind them not to park in areas or interfere with areas that are marked as pedestrian walkways. Below are two recent examples of suppliers improperly parking. Should your drivers not follow the rules, your vehicles may be towed, and or you may be requested to replace the driver with one that will follow the rules, and or you may lose driving privileges within the shipyard.

Another couple of reminders:
No drive times within the Groton Shipyard are: 06:25-06:35, 07:00-07:05, 14:25-14:35, 15:25-15:35 and 23:25-23:35. Please remind your drivers of the no drive times. Should they be in route during one of these times, they shall pull over in a safe area and stop driving until the no drive time has ended.

Please remind your drivers to obey the speed limits within the shipyard as well as to be courteous to fellow pedestrians and other drivers.

Thank You
